

# Company Profile

## Company History

Tosas was established in 1972 as a joint venture / partnership between Sasol and Total, both known for being large fuel suppliers and with international footprints. The business was born as a result of the jointly owned shareholding in the Natref refinery and for them to own a value add binder company Tosas would not only be a retail outlet for bitumen binders but also a profit center through the modification and further processing of penetration grade bitumens.

Sasol became the 100% shareholder in 2008 and then again sold their shareholding of the entire Tosas Holdings to the Raubex Group of Companies in April 2013 through a divestment process involving the Competitions Commissions of South Africa, Botswana and Namibia.

Tosas has a proud history spanning more than 4 decades of supplying quality bituminous products across Southern Africa. Today the company operates from 7 locations in Southern Africa, namely; Wadeville, Bloemfontein, Worcester, East London, Durban, Gaborone and Tsumeb.

Tosas has one of the best bitumen testing laboratories in Southern Africa in is a world leader in the development of new bitumen products.

## Licensees and applicators of Ralumac® Microsurfacing Slurries

## Philosophy of Service

It is of utmost importance that we clearly understand the confirmed need of our clients, in order to present a dynamic and feasible solution to their needs within their budget constraints.

We are totally committed to:

When a client's need is clearly defined, to do everything in our power to deliver our products and services (solution) to the expected outcome our client envisaged.

Further to the above, we highly regard all our staff in the organisation and will do everything in our power to empower them with professional knowledge and skills designated to the task at hand.

Our focus on all our equipment and plant's maintenance and management is well defined to ensure we meet our delivery deadlines as well as the minimizing of downtime on any project we are involved with.

Total client satisfaction is our primary philosophy of service, our soundboard will reflect the amount of times the same client returns to us for road building related solutions.

## Areas of Activity

Tosas is South Africa's leading manufacturers, suppliers and applicators of top quality bituminous road binders and emulsions.

### We provide:

- Pen grade bitumen
- Bitumen primes
- Modified bitumen binders  
(Manufactured on order and sold in bulk only)
- Anionic and cationic emulsions
- Labour intensive road building and road repair projects
- Chippy - Manually operated road surfacing equipment, inclusive of skills development and application training programs

**We have the biggest fleet of equipment, more than 40 binder distributors, 10 mobile rubber plants, 4 mobile PMB plants, mobile emulsion plants and our own Hauler Fleet.**

# LINKING THE AFRICAN CONTINENT

## Products

### Bitumen

- Penetration Grade Bitumens
- Cutback Bitumens
- Dust Paliatives
- Bitukote

### Modified Bitumen

- Polymer modified bitumen spray grad
- Polymer modified bitumen asphalt
- Arm R shield
- Autumn and Winter grade bitumen rubber
- New rubber crumb technology

### Emulsions

- Cationic spray grade emulsions
- Cationic Mix grade emulsions
- Cationic stable grade emulsions
- Anionic stable grade emulsions
- Polymer modified cold applied
- Bitumen Emulsion cracksealant
- Invert Bitumen Emulsion Prime
- Tosas Stabilisation Emulsion
- Invert Bitumen Emulsion Rejuvenator
- Feltec
- FS 60 - Fs65
- Tosas QDP
- EFR 60

We are constantly developing new products in order to give a complete service to our clients

NCRT®  
Ralumac®  
Elasto-Tack  
Poly-e-flex

## Customer Relations

Communication and the administration thereof will eliminate possible misunderstandings and ensure a progressive ongoing relationship with our highly valued clients.
